

# ROMAIN GIOUX

## Web Developer

### PROFESSIONAL PROFILE

Aiming for a career reconversion after 15 years as operational manager, I spent my last 2 years learning how the web is built and how I can contribute in making it a pleasant space.

I'm specialized in front end web development with a strong grasp in modern JavaScript ES6+. I love to create animated web environment and build interactive user interfaces powered by modern technologies. Furthermore technical SEO, clean code and testing are also essential for a complete achievement.

Back end awareness help me to build full stack applications including user authentications, database flows and server communications.

Self-taught, my challenge is to turn this enthusiasm and commitment into a professional activity, gain experience by creating complex projects and join an ambitious team.

### LAST POSITION

#### Project Management Officer Disability Support Worker

Tea Cup Cottage - Capalaba, Australia  
MAY 2018 - JUNE 2020
